EXPERIENCE

Backend Engineer (Django) 2021-2024

Worked on multiple projects from clients of all over the world from Fiverr and Upwork. This working experience enhances my skills for Django as well.

UWNEST APP (Django) 2022-2023

On contract with UWNEST Company, Developed a Django based web application which takes the reviews of the users based on specific Gmail accounts as per restrictions settled up by the administrations and check that review as human language model trained and then decided that whether this review is valid or in-valid. This is lived on <https://www.uwnest.com/>

BONGALO APP (Django) 2023-2023

On Contract with **Codesuite**(The Software Development company), Bongalo app is the resort or hotel reservation application based for Rwanda users. This application is developed on react and Apis on Django which serves for the backend facilities. This is lived on <https://www.bongalo.com/>

LUMA APP | (Django) 2023-2023

On Contract with **Codesuite**(The Software Development company), This Luma application is one of the App same as Jira which manages the tasks generated and assigned to others by the admin and handles the conversations between the users as well and keep their track record of the working by each of the assigned users

On Contract with Computing yard(The software development company),This is the ai based working application which have 3 hierarchy of user with roles as Super-Admin, Admin and Users. Each role-based user has its on specific working for company to handle its allowed section and provide suitable document and its relevant summaries and key points and quizzes for training perspective. This is live on <https://dashboard.traino.ai/dashboard>
